

MUZEJ GRADA PREGRADE
Zlatko Dragutin Tudjina

Muzej grada Pregrade Zlatko Dragutin Tudjina - nova muzejska ustanova u sjeverozapadnoj Hrvatskoj

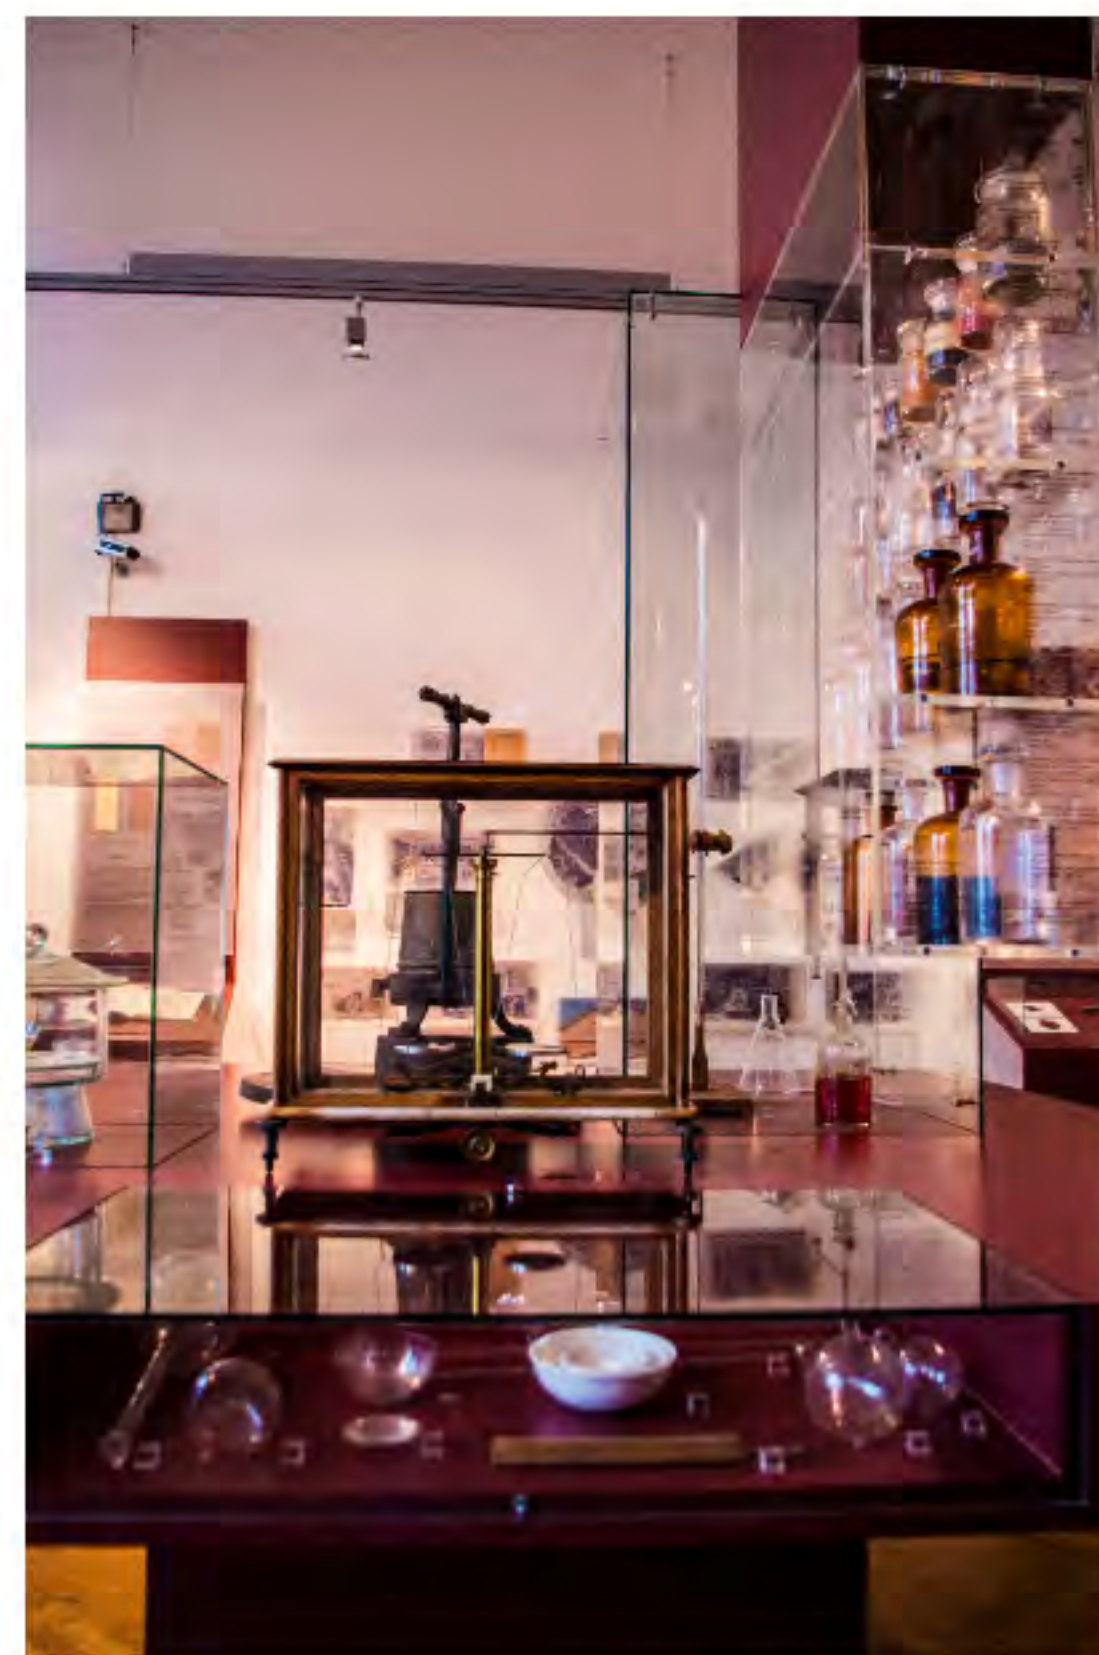

Zlatko Dragutin Tudjina Pregrada Municipal Museum - a new museum institution in the Northwest Croatia

Pregrada je smještena u zapadnom dijelu Hrvatskog zagorja, u Krapinsko-zagorskoj županiji, između rijeke Sutle i padina Maceljske gore. Samo naselje smješteno je podno Kunagore u dolini koju tvori potok Kosteljina. Muzej grada Pregrade Zlatko Dragutin Tudjina osnovan je 2005. godine od strane Gradskog vijeća Grada Pregrade. Muzej se nalazi u središtu Pregrade, nedaleko prekrasne župne crkve Uznesenja Blažene Djevice Marije, poznatije još i pod nazivom „Zagorska katedrala“. Muzej je smješten u obnovljenoj zgradi koja je prvotno sagrađena 1908. za javnu pučku školu. Osim muzeja, u zgradi „Stare škole“ smještena je i Gradska knjižnica Pregrada. Stalni postav otvoren je 2007. godine, a predstavljeno je 639 eksponata. Stalni postav muzeja čine tri zbirke: Ljekarnička zbirka Thierry, Rudarska zbirka i Numizmatička zbirka.

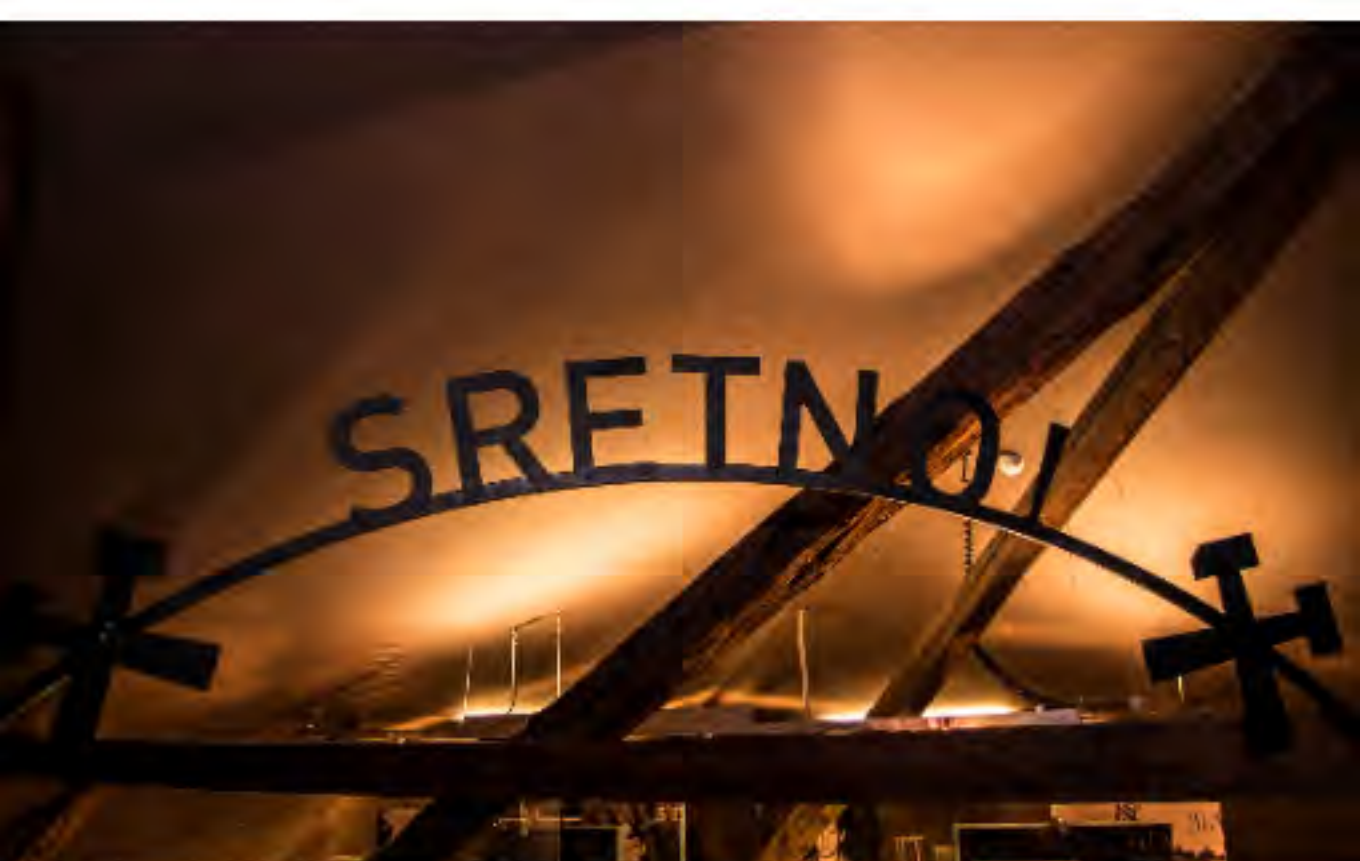

Pregrada is situated in the western part of the region of Hrvatsko Zagorje, in Krapina-Zagorje County, between the Sutra river and the slopes of the Macelj Mountain. The town is located at the foot of the Kunagora Mountain, in the valley of the Kosteljina brook. Zlatko Dragutin Tudjina Pregrada Municipal Museum was established in 2005 by the City Council of Pregrada. The museum is located in the centre of the town, close to the magnificent Parish Church of Blessed Virgin Mary's Ascension, also referred to as „The cathedral of Zagorje“. The museum is placed in a renovated building, which was originally built in 1908 as a public elementary school. Besides the museum, in the „Old School“ building is placed Pregrada Town Library as well. The permanent display with 639 exhibits was opened to the public in 2007. There are three collections at the museum: the Thierry's pharmaceutical collection, the Mining collection and the Numismatic collection.

Ljekarnička zbirka Thierry predstavlja farmaceutsku djelatnost obitelji Thierry čije djelovanje je od izuzetne važnosti za Hrvatsku jer je u Pregradi bila prva industrijska proizvodnja lijekova u Hrvatskoj. Prvi pregradski ljekarnik bio je Hipolit Bilinski, poljski plemić iz Galicije. Nakon što je studirao farmaciju u Lavovu i Beču, gdje je i diplomirao 1866., Bilinski dolazi u Pregradu i otvara ljekarnu koju je nazvao „K anđelu čuvaru“. Nakon njegove smrti, Adolf Alfons Thierry de Chateauxvieux otvara prvu industrijsku tvornicu lijekova 1893. Malo je poznato da su se lijekovi proizvedeni u Pregradi, od kojih su najpoznatiji Centifolijska mast i Čudotvorni balzam, izvozili diljem Europe i sjeverne Afrike.

The Thierry's pharmaceutical collection represents the pharmaceutical activities of the Thierries, the family whose work was of significant importance to Croatia, as the first Croatian production of medicines started in Pregrada. The first pharmacist in Pregrada was Hippolit Bilinski, a polish nobleman from Galicia. After his studies in Lviv and Vienna where he graduated in 1866, he came to Pregrada and opened a pharmacy, which he gave the name „To the Guardian Angel“. After his death, Adolf Alfons Thierry de Chateauxvieux bought his pharmacy and opened the first production facility in 1893. It is rarely known that the medicines made in Pregrada, of which are the most famous Centifolien ointment and Miraculous balm, were exported throughout Europe and northern Africa.

Rudarska zbirka je od izuzetne važnosti za gospodarsku prošlost Pregrade, naime napredak grada uvelike je bio vezan za ugljenokop. U rudniku su radili stanovnici Pregrade, ali i drugih dijelova Hrvatskog zagorja. Nakon više od 100 godina postojanja, rudnik ugljena zatvoren je 1970-ih. Uz povijest rudarstva, u istom prostoru predstavljena je geološka prošlost Pregrade.

The Mining collection is of great importance to the commercial history of Pregrada, since the general development of the town was largely connected to its coal mine. The mine workers were not only the residents of Pregrada, but the inhabitants of other parts of Hrvatsko Zagorje as well. After more than 100 years of mining, the coal mine was closed in 1970's. Along with the history of mining, there is an overview of the geological history of Pregrada.

Posljednja, ali ne i manje važna zbirka je Numizmatička zbirka, koja predstavlja bogatu numizmatičku djelatnost donatora Zlatka Dragutina Tudjine. Gospodin Tudjina, porijeklom iz Pregrade, emigrirao je u München u Bavarskoj. U Bavarskoj državnoj kovnici dao je kovati zlatnike i srebrnjake posvećene hrvatskim povijesnim ličnostima: kralj Tomislav, kardinal Alojzije Stepinac, Marko Marulić, Stjepan Radić, sv. Nikola Tavelić i kardinal Franjo Šeper. Zbirka sadrži kalupe za izradu medalja i srebrnjaka, ali tu je i značajan broj različitih europskih medalja iz Austrije, Njemačke, Francuske, Belgije i drugih zemalja.

The last, but not less important collection is a Numismatic collection, which represents a valuable numismatic work of its donor Zlatko Dragutin Tudjina. Mr. Tudjina, born from Pregrada, emigrated to Munich, Bavaria. In the Bavarian State Mint he ordered a production of golden and silver coins dedicated to the Croatian historic figures, such as: King Tomislav, Cardinal Alojzije Stepinac, Marko Marulić, Stjepan Radić, St. Nikola Tavelić and Cardinal Franjo Šeper. The collections consists of molds for medals and coins, but there is a significant number of various European medals from Austria, Germany, France, Belgium and other countries.
